

Ishank Subudhi

+91-[REDACTED] | Kolkata, India | www.linkedin.com/in/ishank-subudhi

SUMMARY

DevOps / Application Support Engineer with 4.5+ years of experience supporting Payment applications, managing test environments, and contributing to DevOps automation workflows. Experienced in CI/CD pipelines, containerized deployments, Infrastructure as Code (IaC), configuration management, and building observability to improve system reliability. Strong background in incident management, root cause analysis, and maintaining high availability across cloud and on-prem environments.

SKILLS

CI/CD Tools	: Jenkins, ArgoCD, IBM UrbanCode Deploy, SonarQube, Trivy/Snyk
IaC & Config Management	: Terraform, Ansible
Cloud Platforms	: AWS
Containerization	: Docker, Kubernetes (OpenShift), Helm
Operating Systems	: Linux (RHEL)
Version Control	: Git, GitHub, Bitbucket
Monitoring & Observability	: Prometheus, Grafana, AppDynamics, Splunk, Geneos ITRS, ELK
Scripting & Scheduling	: Bash Scripting, YAML, HCL, AutoSys, cron
Security & Compliance	: IAM, Security Groups, CyberArk
Middleware	: IBM MQ, Confluent Kafka, IBM Connect: Direct (NDM)
Methodologies	: ITIL/ITSM, Agile (Scrum & Kanban)

WORK EXPERIENCE

DevOps / Application Support Engineer | TCS, Kolkata

August 2021 - Present

PROJECT: TTS GLOBAL TEM - Payments | CITI Bank

- Built and optimized **CI/CD** and **GitOps** pipelines, reducing release time by **40%** and coordinating application deployments across multiple environments (DEV/UAT/PTE/PROD) to ensure smooth releases for **banking** and **payment applications**.
- Supported containerized workloads on **Kubernetes** / **Red Hat OpenShift**, handling deployment issues, resource tuning, and troubleshooting BAU issues.
- Deployed and maintained **50+ microservices** using **Helm charts** and **ingress controllers**, ensuring **high availability** across environments (DEV/UAT/PTE/PROD).
- Reduced incident resolution time by **35%** by implementing proactive monitoring, centralized logging, and automated recovery in Kubernetes.
- Experienced in maintaining **on-prem, non-containerized environments** alongside cloud-native setups for microservices-based payment applications, ensuring stability, performance, and reliability.
- Supported messaging infrastructure, including **IBM MQ** and **Confluent Kafka**, troubleshooting message flow issues, and ensuring reliable transaction processing.
- Supported **Terraform**-based infrastructure deployments for **AWS** environments, assisting with configuration updates and automated provisioning.
- Monitored **application services** using monitoring and observability tools, proactively identifying performance issues and reducing service disruptions through early alerting.
- Worked with **engineering and compliance teams** to strengthen security practices and align with organizational audit requirements.
- Automated routine operational tasks using **Linux shell scripts**, improving system efficiency and reducing manual effort.
- Collaborated with **development and QA teams** to streamline release cycles and enhance monitoring, automation, and incident handling. Applied **ITIL-based Incident, Problem, and Change Management** practices to maintain high service reliability and faster resolution times.

EDUCATION

Bachelor of Technology, Mechanical Engineering

Academy of Technology • Hooghly, West Bengal • 9.08 DGPA

2021
